**PREMISE**

Education is the process of impacting knowledge and skills on an individual or a group of people. The importance of education has been recognised thus, it is one of the rights every citizen of the country should enjoy but unfortunately the education of girl child has been neglected.

Even though this is gradually taking a new toll, more effort is required. Females are perceived as the bedrock of every society because they are mostly responsible for the upbringing of the children.

**ISSUES**

An educated mother (female) with good character which is acquired during the process of education tends to teach her children all she's got and then thus reflects in the society and vice versa. Girl child education is also important especially when skills or vocations are taught, she gets to become less dependent.

**MORE ISSUES...**

Education also helps to stay in marriage. With all this benefits attached to girl child education, it is then wrong to say education makes one irresponsible as perceived by some people.

**...MORE ISSUES.**

## RECOMMENDATIONS

1. Limit should be set to hawking so that females can get chance to be educated.
2. Parents should endeavour to educate their girl child as this helps breed a well to do society.
3. The fear of God should be inculcated in heart of girl child before sending them to school.
4. Parents should also pray for the progress of their children.
5. When children are in school especially higher institutions of learning they should not be left to themselves. Parents should try to check on them once in a while.
6. Community should support girls child education in any little way they can
7. Both parents should play part in education of girl child as this becomes difficult for just one
8. Parents should not complain when their children are disciplined in school.
